## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 28 – 32, 34 – 37, 40 – 44, 47 – 48 and 58 – 60 are rejected under 35 U.S.C. 102(e) as being anticipated by McIver et al. (US 6,066,673)

Regarding claim 28, McIver et al. (hereinafter "McIver") discloses a disposable article adapted to be worn by a wearer (abstract) comprising one or more compositions for enhancing the removability of fecal waste from the skin of the wearer, said one or

Art Unit: 3761

more compositions being available to at least a portion of one of said fecal waste and said skin of said wearer wherein said disposable article is a diaper (col. 58, lines 6 – 9) and said one or more compositions provide one or more of the following as determined by the test methods set forth in the specification (a) a Waste Contamination Area of less than about 15 cm<sup>2</sup> ;(b) a Waste Contamination Mass calculated from the equation as set forth in col. 75, lines 29 – 37.

McIver discloses the incorporation of carboxymethyl cellulose into the cover of an absorbent article which, as disclosed on page 55 of the applicant's specification, yields the claimed test results.

With reference to claims 29 – 32, 40– 42, see col. 75, lines 29 – 37.

As to claims 43 and 44, see col. 58, line 62 to col. 59, line 14.

Regarding claims 34 and 59, see col. 4, line 10 to col. 6, line 35.

With respect to claims 35 – 37 and 60, see col. 58, line 25 to col. 59, line 39.

With reference to claims 47 and 48, see col. 58, lines 25 – 53 and col. 69, line 53 to col. 71, line 5.

As to claim 58, see the rejection of claim 28.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 49 is rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent No. 6,160,198 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: both the instant application and the U.S. Patent disclose a disposable article to be fitted to a wearer comprising a responsive system including a sensor operatively connected to said article, the sensor adapted to detect an input, and an actuator adapted to perform a responsive function when the sensor detects the input.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3761

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
